

ASPEN INSTALLATION

Installation

06/14/2016

ALPINE TECHNOLOGY GROUP

RECOMMENDED INSTALL CONFIGURATIONS

- Shared server components for ACO/ACTS
- Client components for each ACO/ACTS client
- Full install for ASE-Q
- New computer – client install

06/14/2016

UPDATES

- ACO/ACTS client computers – no update necessary if recommended config followed
- ACO/ACTS shared server – thin install
- ASE-Q - auto update

06/14/2016

ASE-Q AUTO UPDATE

Check File Permissions

In order to perform an upgrade the user must have permissions to the main ASE folder (determined by the location of the wrapper program).

User must also have permissions to overwrite the files included in the upgrade.

User must have access permission to all the files.

If a user does not have permissions, no upgrade is performed. The user will receive message that upgrade cannot be performed.

06/14/2016

PERFORM UPGRADE

- If it is determined that there is an upgrade available, the user receives a message that the upgrade is in process.
- Each file from the posted upgrade (thin install .zip file) is copied to the user's machine. If any component does not copy successfully, the user receives an error message stating that the upgrade failed.

06/14/2016

PERFORM UPGRADE

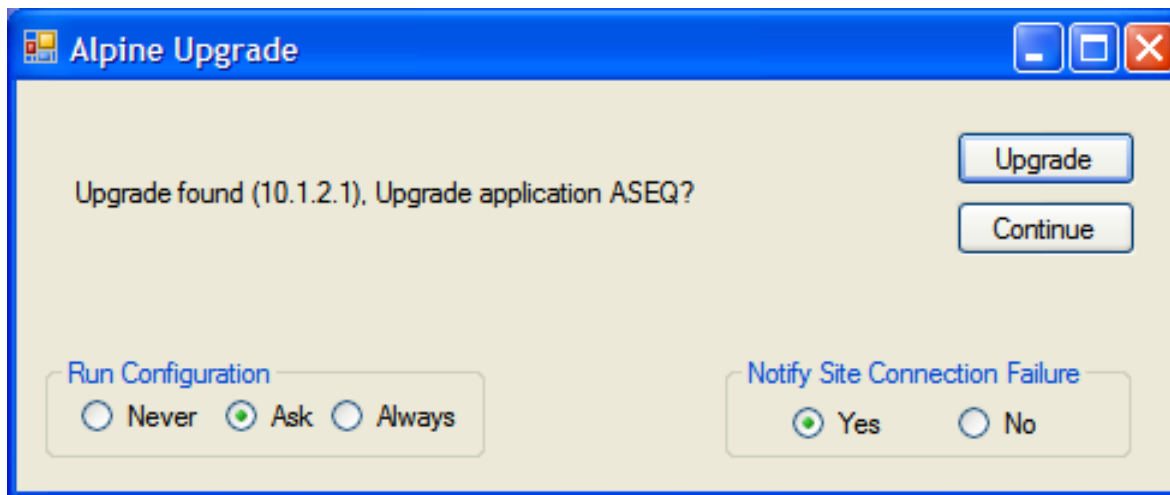

If database changes or QIS static data are part of the upgrade, the database patch file will be included in the posted upgrade file. The actual application of the database patch or transfer of QIS static data happens when ASEQ is launched.

- At time of launch; if an upgrade is detected, the database patch file will be found in the Data subfolder and will be applied.
- If successfully applied, the DBPatch.zip file is removed.

UPGRADE SUCCESSFUL MESSAGE

06/14/2016

UPGRADE COMPLETE; LOG INTO ASE-Q

A Windows-style login dialog box titled "Login". It has a blue title bar with standard minimize, maximize, and close buttons. The main area is light beige. It contains two text input fields: "User Name:" with the text "QISCA7" and "Password:" which is empty. Below the password field is a collapsed section labeled "+ Advanced". At the bottom are two buttons: "Log In" and "Cancel".

User Name: QISCA7

Password:

+ Advanced

Log In Cancel
